About Us

Introduction

BellMe is a unique Wireless Paging Systems provider to various industries in South Africa. Our clients come from a wide variety of sectors namely: restaurants, hospitals, retirement homes, supermarkets & corporates. The BellMe system is wireless and requires minimal installation. BellMe ensures simpler and faster communication, increasing call response time and improving customer service.

Company Description

BellMe provides Wireless Paging Solutions to many industries. While we do this, our focus always remains on helping your customers get the best service.

Our Mission

BellMe would like to ensure the best and most reliable wireless alert system is available to be provided to any Industry in South Africa and Internationally. We intend on doing this by having agents in each city throughout South Africa and abroad.

Our History

Founded in 2012 by Ushir Shah, he came up with the concept of BellMe after repeatedly struggling to get the waiters' attention in a restaurant. The idea is to provide a simple solultion to bridge the gap in communication between Patron and Waitron.

Our Experience

BellMe has the vision and experience to make sure we are around for decades to come and can take care of you while you take care of others.

Testimonials

Villa Sunfield

BellMe never failed to deliver. The service I received was excellent and the product is of very high quality. Our residents now are in safer hands knowing that emergency assistance is available at the touch of a button.

- Sister Lesley Bossert, Nurse Practitioner

Serene Park Retirement Centre

The system is very very very helpful because when it rings you can see the letters very well, they are big and clear and the sound is very very clear

Toilet Panic Button Packages

These packages are guidelines and any one of these may be customized to your needs.

1. Silver Package

Based on 2 toilets per sex and one receiving point.

Each toilet will have a panic button installed and once this is pressed it instantly sends an alert to the LED Light mounted in management office or at reception which will flash red and sound an alert until cancelled.

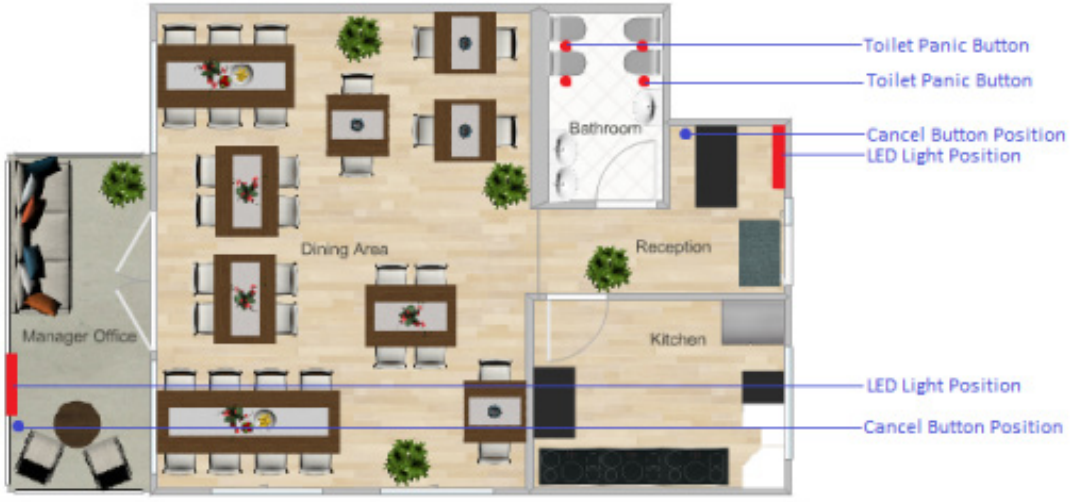

4x Call Buttons

1x Cancel Button

1x LED Light

Toilet Panic Button Packages

These packages are guidelines and any one of these may be customized to your needs.

2. Gold Package

Based on 3 toilets per sex and 2 receiving points

Each toilet will have a panic button installed and once this is pressed it instantly sends an alert to the Display Panel which will be mounted in management office or at reception indicating which button has been pressed. The same alert is also sent to the Wristwatch which can be worn by the security guard if you have one or the Supervisor.

Toilet Panic Button Packages

3. Platinum Package

Based on 3 toilets per sex with a button within the bathroom and multiple receiving points.

Each toilet will have a panic button installed and once this is pressed it instantly sends an alert to the LED Light which will flash red and sound an alert above the bathroom where the call came from until cancelled. The same alert is also sent to the Wristwatch which can be worn by the security guard if you have one or the Supervisor. You will also have a display panel which can be mounted at reception or in the manager's office to display which button was pressed. With this Display Panel you can also track the response time and see how long it took to respond to a call. You also have the capabilities to extract reports and see when buttons were pressed more often.

Why go Wireless with BellMe?

- We offer support and are willing to go the extra mile for our customers.
- BellMe is easy to operate. If your team would like to modify and adjust the system, BellMe will provide videos so that you can take control and we will be there to provide support. Self Installation is a breeze. Simply mount our call buttons onto a flat surface and you are good to go.
- BellMe will save you money compared to other wireless and wired systems as BellMe installations are a once-off payment. No Monthly Rentals.
- Accountability is essential when it comes to BellMe. Our Software allows you to capture all activity, giving you information that will help motivate excellent staff performance.
- We have a range of display monitors and receivers, giving you the freedom to display what you desire.
- Always Connected. You do not need to rely on network coverage – our panic button transmits via a radio frequency. With this your device can easily transmit across a 6 bedroom home.
- Zero Contracts. All BellMe Products are once off purchases. We do not sign you into rental contracts that only cost you more money when you could have just bought a system that will last you a lifetime.
- BellMe has a one-year Warranty on the wristwatch receivers. BellMe also boasts a two- year warranty on the Display Panels and a five-year warranty on Call Buttons.
- BellMe is the sole distributor of this product in South Africa.
- All BellMe products are ICASA approved.

Industries - Public Toilets

A Panic Button for your toilet you say?

For parents having their children safe is a major concern and BellMe would like to give Companies the opportunity to put measures in place. Toilet panic buttons will not only keep you safe in an event of intrusion but also to those who fall ill and cannot shout for assistance.

Prevent Violation

You do not want something as horrible as an unlawful violation to happen at your premises. Not having a panic button in place could leave your company at risk of losing business and leave you with a bad reputation if something had to happen. All you need to do to prevent this is to ensure that you have a reliable panic button in place in all your toilets and bathrooms.

Peace of Mind

Have peace of mind that your visitors are safe even when you can't see them. You can also give your clients this same sense of security and safety when they visit your facility. Imagine a world where you can go to a toilet and not be afraid of being held against your will or falling ill and being unable to call for help. You can create this world by having a panic button in all your toilets and bathrooms!

Display Monitor B-900

This display monitor is ideal for larger areas which have multiple toilet areas.
If you require more detailed information displayed such as area (male or female) or area name and toilet number, then this display panel is ideal for you. It has a reporting feature integrated and is required to be connected to a pc or laptop to ensure call records are captured giving you insight into the response time of your staff.

Features & Benefits

What makes the B900 the best Display Monitor we have ever sold?

Remote Login & Support is possible with the B-900 if connected to a pc or laptop with internet access. We can log in and make adjustments saving you time and hassle.

Built in Integrated Reporting Software: Connect a LAN* cable to a PC or Laptop, and you will have access to:
- Floor plan of your property.
- Detailed calling information.
- Statistics and Graphs on response time.
- Export to Excel to easily share.

**Please note, the LAN cable must not exceed 5m and will need to be purchased separately. The software is included with the display panel.*

ABC123

Display Options: The B900 Display Screen shows you up to 10 characters per line, e.g.: "TOILET -01". It also can show two calls at the same time. If more than two people press the call button at the same time, it rotates between them allowing you to see who has not received attention.

Capacity: Each display panel has a capacity of 512 buttons.

Alert Output Options:
- Use the already onboard sound which is relatively loud.
- Connect a HI-FI unit to make it sound even Louder with the auxiliary out.
- Connect a Siren for an even louder alert.

Ringing Options:
- Continuous Ringing until cancelled (exclusive feature)
- Single Ring or Interval Ringing.

Backup and Restore:
We understand the importance of having 100% uptime. With this display panel, you will not need to reprogramme the call buttons in an event it is damaged. The B-900 calling information can be backed up and copied to another display panel and sent to you in the event of an emergency.

Zero Loopholes: One cannot cancel a call on this display panel and wristwatch, the staff member must be present at the call point to cancel it, which is captured by the BellMe Software.

Optional Extras

Backup Power Supply (UPS).
Get a backup power supply for this Display Monitor so that it will be able to run during a power failure.

Technical Information: Working Voltage: DC 12 V – 18 V • Working Current: < 1000 mA • Frequency: 433 MHZ +/- 75K • Audio Out Power: 1 W Recovered Sensitivity: 100 db Remote control: Working Voltage: 9 V • Working Current: 15 mA • Frequency: 433 MHZ +/- 75K
Power Adapter: Working Voltage: 18 V • Working Current: 1 A • Dimensions: 535x158x40mm

Display Monitor B-99E

Suitable for companies who would like to easily adjust the calling information and additional call buttons as they go.

Features & Benefits

ABC123

Display Options: The B-99E has a three digit display. It can display all numbers, and the first digit can either be the following ten alphabets (A, B, C, D, E, F, H, L, P, U) or numbers only.
EG: A01-U99 and / or 000-999.

ABCD123

Queing Mode: You can also see how many calls are awaiting assistance. The first digit will display the number of outstanding calls.

Rolling Display: If multiple calls come through at the same time, it will roll between each call at the desired interval of 5-99 seconds.

Auxilliary Out: Want to wake up the neighbours? Connect an external HI-FI to this Display Unit with an Aux Cable.

Easy to Use: The B-99E is popular due to the ease of use and adjusting the programming on the side of the Display Monitor in 3 easy steps.

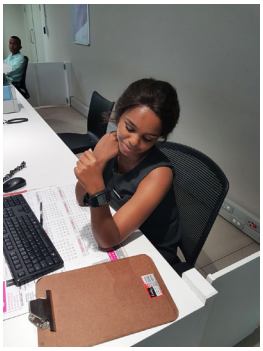

Auto Cancel or Cancel button compatible:
- **Auto Cancel** - used when you know that you will see the screen within a given time frame 5-99 Seconds and attend to the call.
- **Cancel Button** - The staff member would have to actively cancel the call button on the screen or a cancel button at the toilet / call point.

Capacity: The B-99E has a capacity of 256 Buttons.

Technical Information: Working Voltage: DC12V • Working Current: <900M Frequency: 433 MHZ +/- 75K • Working Distance: >150m • Sensitivity: 106 dB Audio Output: 2w • Dimensions: 535x158x40mm

Wristwatch Receiver B-650

Need to receive a call between clients? When a call button is pressed it appears on the wristwatch, the designated person can attend to the call immediately.

Features & Benefits

Receive the Notification on the MOVE! In a situation where you would like faster response times, not having to go to the Display Station to view the details saves you time. The wristwatch gives you an immediate notification while attending to another person.

Capacity: The wristwatch receiver has a capacity of 200 Transmitters.

ABC123

Display information: Display either four numbers "0000"-"9999" or use the first digit as a letter, from A-F. Eg: "A001"-"F999".

Rechargeable Battery: Recharge the lithium-ion battery every 2-5 days in a nursing environment (depending on use). Battery life is indicated on the display.

Wearable on a Lanyard or Wrist: You have two options: Remove the watch straps and wear the wristwatch on a lanyard (comes with adapters) or wear it on your wrist.

Signal Strength Indication: You can see the strength of the signal displayed on the wristwatch. If you require it to travel further than the standard 150 metres, add signal repeaters for an extended range of up to 1 KM.

Technical Information: Working Voltage: DC12V • Working Current: <900M Frequency: 433 MHZ +/- 75K • Working Distance: >150m • Sensitivity: 106 dB Audio Output: 2w • Dimensions: 535x158x40mm

Single Key Call Button B-A1-WL

Applications: This is our most popular call button when someone needs to call for assistance.

Features & Benefits

100% Waterproof:
Can be submerged in water.

Batteries:
Requires an A23 battery which lasts up to 1-2 years depending on use.

Mountable:
The button can be mounted on the wall or any flat surface as it comes with a mounting bracket.

Cancel buttons (B-A1-BC):
Are an ideal fit for this call button if you would like to have the response time captured via the BellMe Software.

Call Button is Waterproof

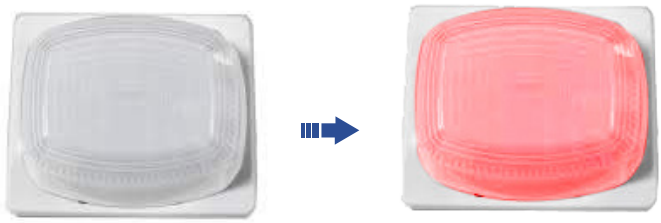

Call Button Mounting Bracket

Call Button Mounted on Wall

Technical Information: Dimensions: 60mmx60mm • Transmission Distance: 300m in an open area • Battery: A23 • Radio Frequency: 433MHz up to 600m range with repeaters

LED Light Receiver B-700

This receiver can be installed above the toilet entrance to easily identify the toilet stall without having to return to the display station. It will flash & alert with sound. Cancel buttons must be present to disable the light.

Features & Benefits

Capacity:
Stores up to 99 call buttons & requires a cancel button. (49 call & cancel or 98 call & 1 cancel).

Alert Tones:
Silent or Beeping noise. Please see website for video and sounds. This LED Light also flashes bright red upon pressing the call button.

Cancel with one or multiple:
A cancel button is used to stop the light from flashing and making a noise. The LED Light cannot work without a Cancel button. You can share one cancel button for multiple call buttons or have a cancel button for each call. The configuration would be dependent on what you would like displayed on your display panel, so it is compatible with the display information required. Please speak to a consultant.

12V Power:
Even though it is part of our wireless range, all receivers require constant power except the wristwatch receiver. The signal transmits wirelessly from the call button to the LED light. The LED light comes with a 12V power supply.

Technical Information: Working Voltage: DC12V 500mA Sensitivity: 106dB Working current: <65mA • Volume Output: 85dB Standby Current: <10mA Working environment: -40-80ºC Dimensions: 104x86x38mm

Signal Repeater/Booster B-Q4

Your may need signal repeaters to carry the signal further. These signal repeaters are installed where the signal falls short. BellMe has successfully installed repeaters on sites that span over three floors.

Features & Benefits

Capacity:
Unlimited capacity as the call buttons does not need to be programmed to the repeater.

Antennae:
With two Antennae to help receive and transmit the signal, the device ensures that BellMe sufficiently covers your site with ease.

12V Power:
The signal repeater requires a power source and is supplied with a 12V adapter.

Battery Backup :
In case of a power failure, the repeaters have an internal rechargeable battery pack that will power the unit for up to 1.5 - 2 hours.

Technical Information: Wireless Frequency: 433MHz • Receiving and Transmitting Distance: up to 200m
